EDITOR
British Medical Journal

KENNETH TILL
(Technical Editor)

This *Journal*, founded by the Medical Society for the Study of the Venereal Diseases, publishes original work on the investigation and treatment of genitourinary and allied disorders, and review articles, correspondence, and abstracts.

Advice to authors Papers for publication, which will be accepted on the understanding that they have not been and will not be published elsewhere and are subject to editorial revision, should be sent in duplicate to Dr A Mindel, Academic Department of Genitourinary Medicine, James Pringle House, Middlesex Hospital, London W1N 8AA. All authors must give signed consent to publication. The editor should be notified of any change of address of the corresponding author. Manuscripts will only be acknowledged if a stamped addressed postcard or international reply coupon is enclosed. Rejected papers will not be returned. Figures will be returned if requested at the time of submission.

Full details of requirements for manuscripts in the Vancouver style (*Br Med J* 1982;284:1766-70) are given in *Uniform requirements for manuscripts submitted to biomedical journals*, available from the Publishing Manager, *British Medical Journal*, BMA House (50p post free). Briefly details are as follows:

(1) *Scripts (including correspondence and book reviews)* must be typewritten on one side of the paper in double spacing with ample margins. Two copies should be sent.

(2) *Each script* should include, in the following order: a brief summary (structured summaries are preferred), typed on a separate sheet, outlining the main observations and conclusions; the text divided into appropriate sections; acknowledgements; references; tables, each on a separate sheet; and legends for illustrations.

(3) *The title* of the paper should be as brief as possible.

(4) *The number of authors* should be kept to the minimum, and only their initials and family names used.

(5) *Only the institution(s)* where work was done by each author should be stated.

(6) *SI units* must be used. If old fashioned units are used, SI units should be given in parentheses or, for tables and figures, a conversion factor given as a footnote.

(7) *Only recognised abbreviations* should be used.

(8) *Acknowledgements* should be limited to workers whose courtesy or help extended beyond their paid work, and supporting organisations.

(9) *Figures* should be numbered in the order in which they are first mentioned, referred to in the text, and provided with captions typed on a separate sheet. (*Diagrams*: use thick, white paper and insert lettering lightly in pencil. *Photographs*: should be marked lightly on the back with the author's name and indicating the top, and should not be attached by paper clips or pins. They should be trimmed to include only the relevant section (and will be reproduced 68 or 145 mm wide) to eliminate the need for reduction. Photomicrographs must have internal scale markers. Radiographs should be submitted as photographic prints, carefully prepared so that they bring out the exact point to be illustrated.

(10) *Tables* should be numbered, have titles, and be typed on separate sheets. Please avoid large tables and use the format which appears in current issues.

(11) *References* should be numbered consecutively the first time they are cited and identified by arabic numbers in the text, tables, and

legends to figures. Authors must take full responsibility for the accuracy of their references, and the list should be kept as short as practicable. It should be in the order in which references are first mentioned, and should include (in the following order), *journals*: author's name and initials, title of paper, name of journal (in full or abbreviated according to the list in *Index Medicus*), year of publication, volume number, and first and last page numbers; *books*: author's name and initials, full title, edition, place of publication, publisher, and year of publication. When a chapter in a book is referred to, the name and initials of the author of the chapter, title of the chapter, "In:", name and initials of the editor, and "ed" should precede book title, etc as above. In references to journals or books, when there are seven or more authors the names of the first three should be given followed by "et al." Names of journals no longer published should be given in full — for example, *British Journal of Venereal Diseases*.

Proofs Contributors receive one proof, and should read it carefully for printers' errors and check the tables, figures, legends, and any numerical, mathematical, or other scientific expressions. Alterations should be kept to a minimum.

Reprints 25 reprints will be supplied free of charge. A limited number of additional reprints may be ordered from the Publishing Manager when the proofs are returned.

Notice to Subscribers This Journal is published bimonthly. The annual subscription rates are £80.00 inland, £92.00 overseas, and \$147 in the USA. Subscribers may pay for their subscriptions by Access, Visa, or American Express by quoting on their orders the credit or charge card preferred, the appropriate personal account number, and the expiry date of the card. Orders should be sent to the Subscriptions Manager, *Genitourinary Medicine*, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA, subscription orders, with or without payment, can be sent to: *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046. All inquiries, however, including those regarding air mail rates and single copies already published, should be addressed to the publisher in London.)

Second class postage paid, Rahway NJ Postmaster. Send address changes to: *Genitourinary Medicine* c/o Mercury Airfreight International Ltd Inc, 2323 Randolph Avenue, Avenel, NJ 07001, USA.

Notice to advertisers Applications for advertisement space and for rates should be addressed to the Advertisement Manager, *Genitourinary Medicine*, BMA House, Tavistock Square, London WC1H 9JR.

Apart from any relaxations permitted under national copyright laws, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or of articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

Notices

The British Society for Colposcopy and Cervical Pathology

The Annual General Meeting and Scientific Meeting will be held 29–31 March 1990 in Sheffield.

Details may be obtained from the Conference Office, Department of Obstetrics, Clinical Sciences Centre, Northern General Hospital, Herries Rd, Sheffield, S5 7AU, UK.

International Union against Venereal Diseases and the Treponematoses (IUVDT)—35th general assembly

The 35th general assembly of the IUVDT will be held on 9–11 May 1990 at the Royal Society of Medicine, London. The subject will be "Sexually transmitted diseases in the age of AIDS".

For further details please contact Barbara Komoniewska BA, Assistant Medical Services Secretary, Royal Society of Medicine, 1 Wimpole Street, London W1M 8AE. Telephone 01-408 2119, telex 298902 ROYMED G.

The Combined Australasian STD Conference and Sixth Regional IUVDT Meeting will be held in Queenstown, New Zealand, from 30 July to 3 August 1990. For further information contact: Kerry Buchan, 1990 Australasian STD Conference, 48 The Octagon, P.O. Box 5457, Dunedin, New Zealand.

Medical Society for the study of Venereal Diseases

The Royal Society of Medicine

1 Wimpole Street, London W1M 8AE, UK

Honorary Secretary's Report to the 68th Annual General Meeting held on 13 October 1989

During the past year 35 new members have been elected. Membership is 507, 130 of

whom live overseas. In the past year one honorary life member was elected, Dr J D Oriol. It is my sad duty to report the deaths of two of our honorary life members, Dr Letitia Fairfield and Dr L Z Oller. At present there are 28 honorary life members, 21 of whom live in the United Kingdom.

Six ordinary meetings were held during the year. The Society is most grateful to Cilag Pharmaceutical Ltd for financial support for the meetings. We are indebted to the Royal Society of Medicine for enabling us to hold our meetings here.

An overseas Spring Meeting of the Society was held at Bordeaux 19–21 May 1989; 44 papers were presented including one by a guest lecturer Professor E Stolz (Rotterdam), and 25 papers were shown as posters. The standard was very high and the numbers attending, a record well over 160. The second MSSVD Spring Meeting Prize was awarded to Dr C O'Mahony of the University Department of Genitourinary Medicine, Royal Liverpool Hospital. During the meeting on 19 May 1989 the seventh Harrison lecture was given by Dr J Wallin of Stockholm, entitled *Sexually transmitted disease prevention—what to learn from the HIV/AIDS epidemic*.

The President, Honorary Secretary and the Harrison Lecturer were privileged to receive medals of honour from the office of the Deputy Mayor of Bordeaux, M J Chaban Delmas, on behalf of the Republic of France in a ceremony on 19 May. The Society is indebted to Professor Marc Geniaux of the Department of Dermatology, University of Bordeaux II for helping to make the meeting such a success. The Society is grateful to all the pharmaceutical houses which contributed towards financing the Spring Meeting in particular Bayer UK, Cph, Gist-Brocades, Janssen Pharmaceuticals, Pfizer and Wellcome Medical Division. At the end, however, the success of the Spring Meeting is due to members continued support.

The eighth Genitourinary Study Weekend for Junior Doctors was held at Tetley Hall, University of Leeds on 1–2 April 1989. Over 90 doctors attended. The Society is most grateful to Bayer UK who gave full financial support for the meeting. The next weekend will be on 31 March–1 April 1990 and will be again at Leeds. Bayer UK has again promised full support.

The MSSVD and The Dutch Society for the Study of Sexually Transmitted Diseases is holding a joint meeting in Amsterdam 17–18 November 1989, on Sexually Transmitted Diseases, viral infections as a cause of STD. The President and Honorary Secretary have represented MSSVD on all Committee

Meetings in planning this occasion. This meeting will celebrate the 10th Anniversary of the Dutch Society.

The Council of the Society held six meetings at which many items of interest to the specialty were discussed. Of particular importance, were matters concerning health advisers in sexually transmitted diseases, the report of the Working Group to examine workloads in Genitourinary medicine Clinics (A Monks' Chairman) and the relationship of Genitourinary Medicine to MSSVD. A large task for the Council is to work out suitable subjects for ordinary meetings.

Genitourinary Medicine, volume 64 in 1988, consisted of 426 pages and contained 85 original articles. We thank the former editor since 1982 Dr A McMillan for his enormous contribution to medical literature and welcome the new editor Dr A Mindel.

A sad point has now been reached. In October 1981 I took over from my predecessor Dr J Barrow who like the Treasurer at the time, Dr J K Oates, had been admitted to the Society in 1953, at which time the Honorary Secretary was Dr W Neville Mascall, who held the post from 1945–1960, itself not a record, which was held by an early Honorary Secretary Dr E R T Clarkson (1922–1939). It is now the time to say farewell to the post that I have held, which I have thoroughly enjoyed. Over the eight years I have served under five Presidents. Enormous changes have come to the specialty of Genitourinary Medicine, the impact of HIV/AIDS epidemic, colposcopy, the increasing influence of the Royal College of Physicians, and relations with our neighbours in Western Europe. Enormous changes have come in communications, computers, word processors, fax and video. We have found a fine home at the Royal Society of Medicine since October 1986.

I am most grateful for the help of the Presidents and Council which I have served and the enormous cooperation showed by our able Honorary Treasurer, Dr J S Bingham, an able steward, and Dr M R FitzGerald, our Assistant Secretary. One has only to look through the admissions to membership of MSSVD since I became a member in 1969, and especially so since 1981 to realise that the vast majority of our members are now comparatively young and that is why a time for a change has come and I ask you and recommend to you, full support for the incoming and first lady Honorary Secretary, Dr Margaret J Godley.

M A WAUGH

Honorary Secretary, Medical Society for the Study of Venereal Diseases 1981–1989.

Index to volume 65, 1989

Authors and subjects are indexed together. There are two separate indexes of subjects and authors of current publications. (When there are four or more authors only the first three are indexed.) Page numbers preceded by (MA) refer to Matters Arising.
